Discussion

U.S. Patent 6,202,649, which issued from parent application Serial No. 09/397,018, is involved in a litigation styled *Star Scientific, Inc. v. R.J. Reynolds Tobacco Company*, Civil Action No. 01-AW-1504, pending in the United States District Court for the District of Maryland. Documents AA-AF and AH listed on the attached form PTO-1449 were identified in defendant R.J. Reynolds Tobacco Company's response to plaintiff Star Scientific's first set of interrogatories ("Response"). A copy of the Response in its entirety is included in this submission and listed as document AI on the attached form PTO-1449. Documents AA-AF and AH were identified by R.J. Reynolds among a multitude of documents and activities asserted to invalidate the claims of the '649 patent (see response to Interrogatory 15, pages 17-19). Document AG on the attached form PTO-1449 was identified by Examiner Colaianni in co-pending application Serial No. 09/559,876 in an Office Action dated January 31, 2001.

Although Applicant respectfully disagrees with R.J. Reynolds' characterization of the documents and believes that the documents are merely cumulative to art already of record, Applicant respectfully requests that the Examiner consider the Response in connection with consideration of the other documents contained herein.

Respectfully submitted,
BANNER & WITCOFF, LTD.
